

The Berlin-based company botspot has been developing and producing photogrammetric 3D scanners since 2013 and is one of the most innovative companies in this industry.

Our demand for the quality of our products is the driving force for intensive research and development work. botspot meets the increasing demand for individual and groundbreaking solutions.

For this reason, we are looking for flexible and motivated employees to strengthen our team as soon as possible in a permanent position as a

Frontend Engineer (m/f/d), full time Berlin

Your field of work:

- Development of application software for scanning systems, web-based or desktop-based, from the design of UX and UI to the implementation into highly modern frameworks

Your profile:

- Completed studies in computer science (diploma/bachelor/master) or similar
- Professional experience with frontend development
- Profound knowledge in the fields of UX and UI
- Experience with modern web frameworks (e.g. Vue, Angular, React)
- Experience with the desktop framework electron
- Knowledge of relevant IoT technologies (e.g. HTTP, MQTT, Websockets)

Our offer:

- responsible, interdisciplinary tasks and projects in an international high-tech company
- Entry into the 3D industry through a variety of contact points
- home office
- Self-determined working method
- a passionate team with a flat organization and an open corporate culture
- training opportunities
- Employee participation in the company
- Free drinks/ coffee

We look forward to receiving your application with details of your salary expectations and your earliest possible starting date at career@botspot.de. If you have any questions, please do not hesitate to contact Mrs. Maria Ortner at +49 30 985 40 400.
